2003-2006 HONDA CBR600RR

The VW Air-Cooled Engine is a no-nonsense engine manual that any practical-minded person can understand, giving a highly illustrated step-by-step guide to dismantling and rebuilding a Type 1 engine. Most of the operations described in the book can be applied to the Type 4 unit used in 1700, 1800 and 2-litre Transporter models as well. Topics covered included workshop essentials; keeping the engine healthy; removing and stripping down the engine; examination of the engine components; reassembling the engine and ancillaries and full specifications of the various Type 1 and Type 4 engines. With over 300 colour images, this book will be an invaluable resource for anyone involved in the repair and maintenance of these iconic engines.

This is the first book to provide a broad framework for obtaining an in depth understanding of the state-of-the-art knowledge on abnormalities of non-coding RNAs found to be associated with colorectal cancer pathogenesis. Readers will discover possible mechanisms underlying the substantial roles played by non-coding RNAs in molecular hallmarks of colorectal cancer. This work further provides the comprehensive overview and novel insights into using of non-coding RNAs as colorectal cancer biomarkers enabling early detection of the disease, prognostic stratification of the patients and prediction of therapeutic response. The reader is introduced to the overview of modern non-coding RNAs-based therapeutic strategies, and summary of their preclinical testing performed in colorectal cancer. The work is written for researchers who want to explore current state of the knowledge in this interesting field of molecular oncology.

Yamaha YZF-R1 1998-2003

Here, Volkswagen enthusiast and prolific author Richard Copping examines, for the first time, the complete story of the T4 from the Transporter concept originated forty years before its presence at VW's Hanover factory, through its development period and full production life. Topics covered include: the background story 1949-1990; design concept to production in the 1980s; full analysis of the T4's specifications; face-lifted Caravelles and Multivans from 1996 onwards; petrol- and diesel-aspirated engines including the VR6, V6 and 2.5 litre TDI; the T4 story in the USA - the Euro Van and finally camping conversions. The complete story of the Volkswagen T4, produced between 1990 and 2003 and the first book in the English language to have been written, illustrated and published solely about the T4, beautifully illustrated with 300 colour photographs - a sparkling mixture of archive and modern-day imagery.

During the past decades, with the introduction of the recombinant DNA, hybridoma and transgenic technologies there has been an exponential evolution in understanding the pathogenesis, diagnosis and treatment of a large number of human diseases. The technologies are evident with the development of cytokines and monoclonal antibodies as therapeutic agents and the techniques used in gene therapy. Immunopharmacology is that area of biomedical sciences where immunology, pharmacology and pathology overlap. It concerns the pharmacological approach to the immune response in physiological as well as pathological events. This goals and objectives of this textbook are to emphasize the developments in immunology and pharmacology as they relate to the modulation of immune response. The information includes the pharmacology of cytokines, monoclonal antibodies, mechanism of action of immune-suppressive agents and their relevance in tissue transplantation, therapeutic strategies for the
