With the sixteenth edition of Financial and Managerial Accounting: The Basis for Business Decisions, the Williams author team continues to be a solid foundation for students who are learning basic accounting concepts. In this revision, the authors have added to and refined the coverage of International Financial Reporting Standards (IFRS), particularly in Chapter 15 ("Global Business and Accounting"). Hallmarks of the text—including the solid Accounting Cycle Presentation, relevant pedagogy, and high quality, end-of-chapter material—have been updated throughout the book.

While many texts characterize themselves as having either a "user" approach or a "preparer" approach, Williams' Financial Accounting is written for faculty who want to strike a balance between these approaches. Business majors will find relevance in the "Ethics, Fraud & Corporate Governance," "Your Turn" and "Case in Point" boxes throughout the chapters while accounting majors will receive a firm grounding in accounting basics that will prepare them for their intermediate course.

This allows students to link concepts and numbers together in an interactive rather than print environment.

Forms for the practical applications described in the text, available separately.
